Read Barcodes from Various Sources

- Images including bmp, jpg, png, gif, and single-page or multi-page tiff image files
- Black/white, grayscale or color images
- Single-page or multi-page PDF files
- Device-independent bitmap (DIB) formats which can be obtained from cameras or scanners
- An image encoded as a base64 string
- An image file stream in raw buffer

Barcode Reading Results

- Barcode format
- Barcode text
- Barcode bytes
- Barcode angle
- Module size
- The name of the document including the barcode
- Page number
- Region name
- The coordinates of the barcode vertices

Powerful Image Pre-processing and Barcode Decoding

- Multi-thread barcode processing
- Reads multiple barcodes in one scan
- Reads barcodes within a specified image area
- Can read poor quality barcodes, such as out-of-focus blurred images, damaged barcodes, overexposed images.
- Detects barcodes at any orientation and rotation angle

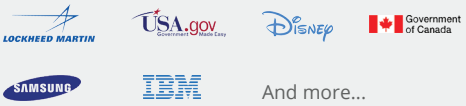

Customizable Barcode Scanning to Suit your Use Case

For different use cases, you can customize the barcode reading configurations for the best performance. For example, you can specify the barcode region, barcode count, barcode format, deblur level, anti-image level and more.

Paid service to customize the barcode reading settings is also available. Please contact support@dynamsoft.com if you are interested.
